

# Solanax

Developing a Scalable and Sustainable  
DeFi Network

Investors Pitch Deck

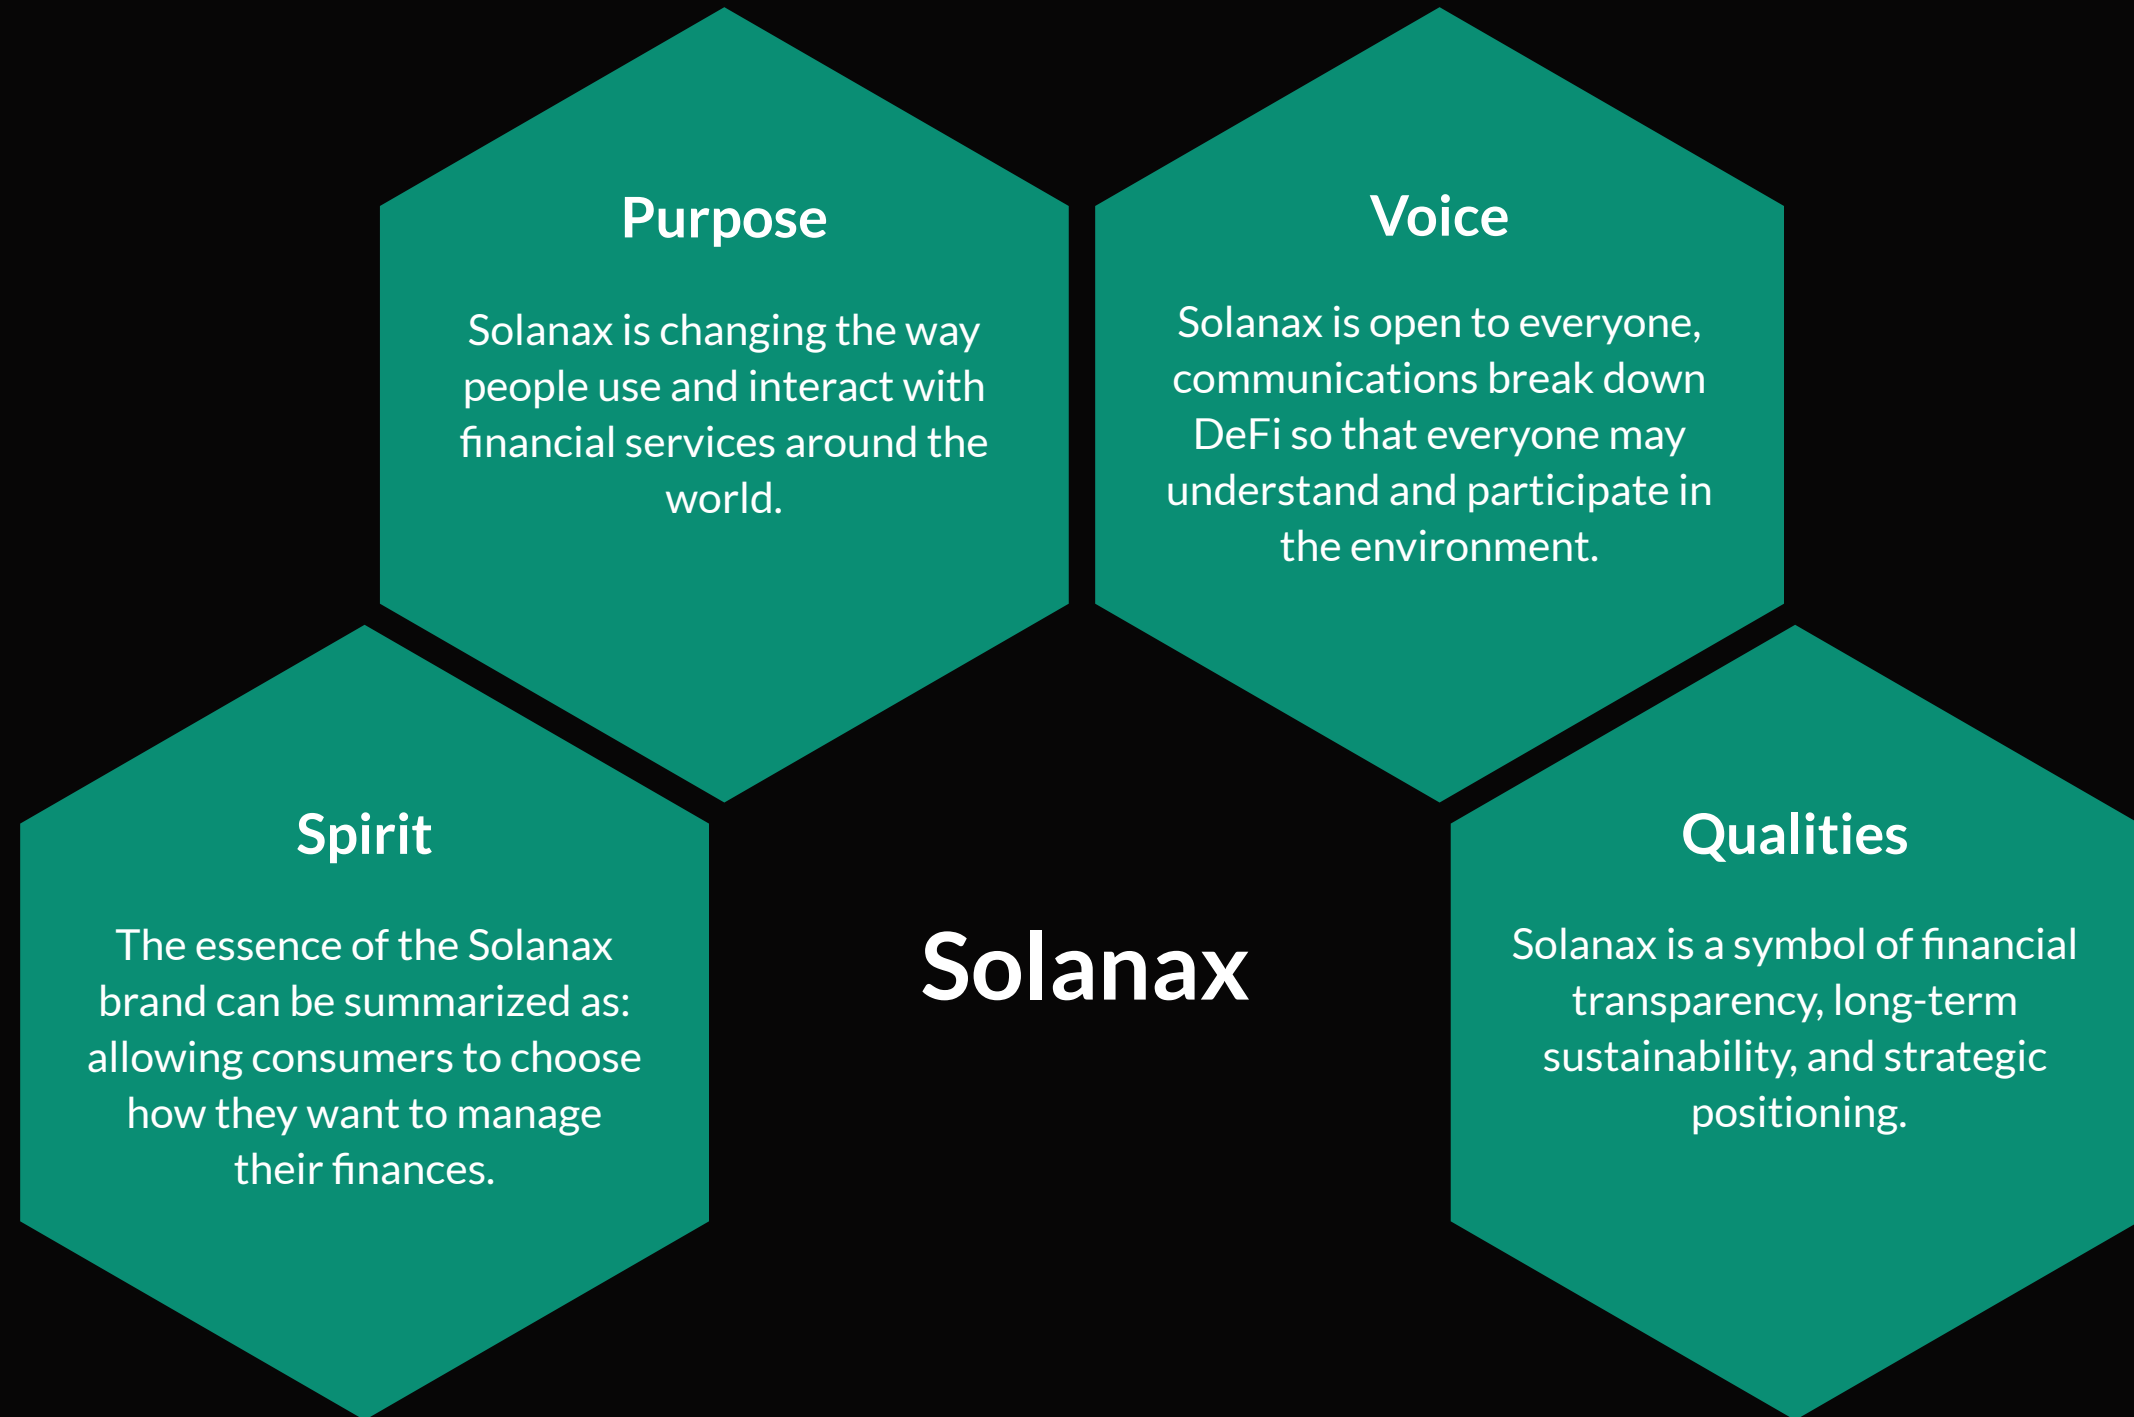

DeFi users are discriminated against simply because the cost of gas on ethereum is so enormous that only the wealthy can afford it.

It's officially the time for Solana and Ethereum to compete head-to-head to become the block-chain platform of choice for developers.

# Brand

# Qualities

## Faster and cheaper:

We leverage the **Efficiency** of Solana's blockchain to produce transaction speeds that are far faster than Ethereum and gas prices that are significantly lower.

## A central order book:

Solanax will give **On-Chain Liquidity** to the central limit order book, allowing access to the whole Solanax ecosystem's order flow and liquidity.

## Interface for trading:

Traders who wish to view TradingView charts, make **Limit Orders**, and have greater control over their trading activities are encouraged to join our community.

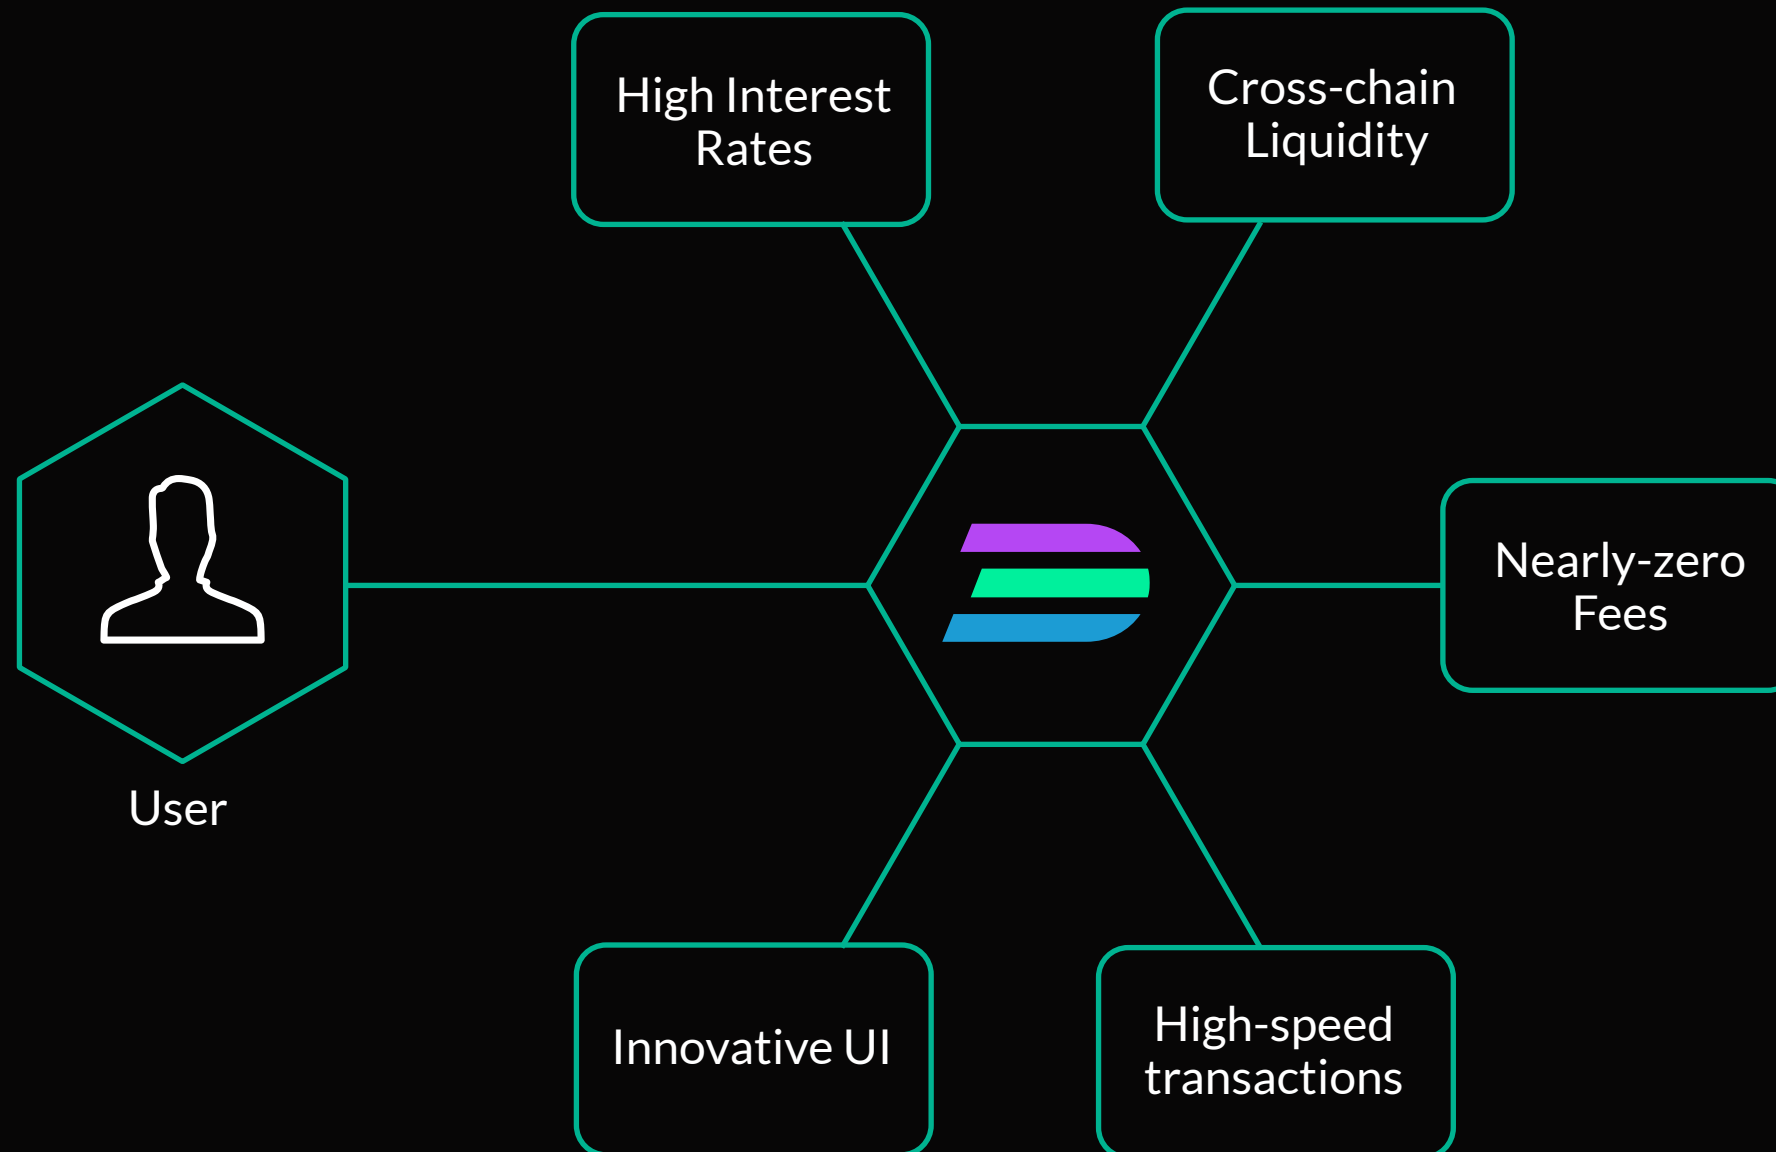

## Wormhole bridge:

An unrestricted, decentralized **ERC-20 $\rightleftharpoons$ SPL** token bridge that allows projects, platforms, and communities to move tokenized assets from one blockchain to another.

# Ecosystem

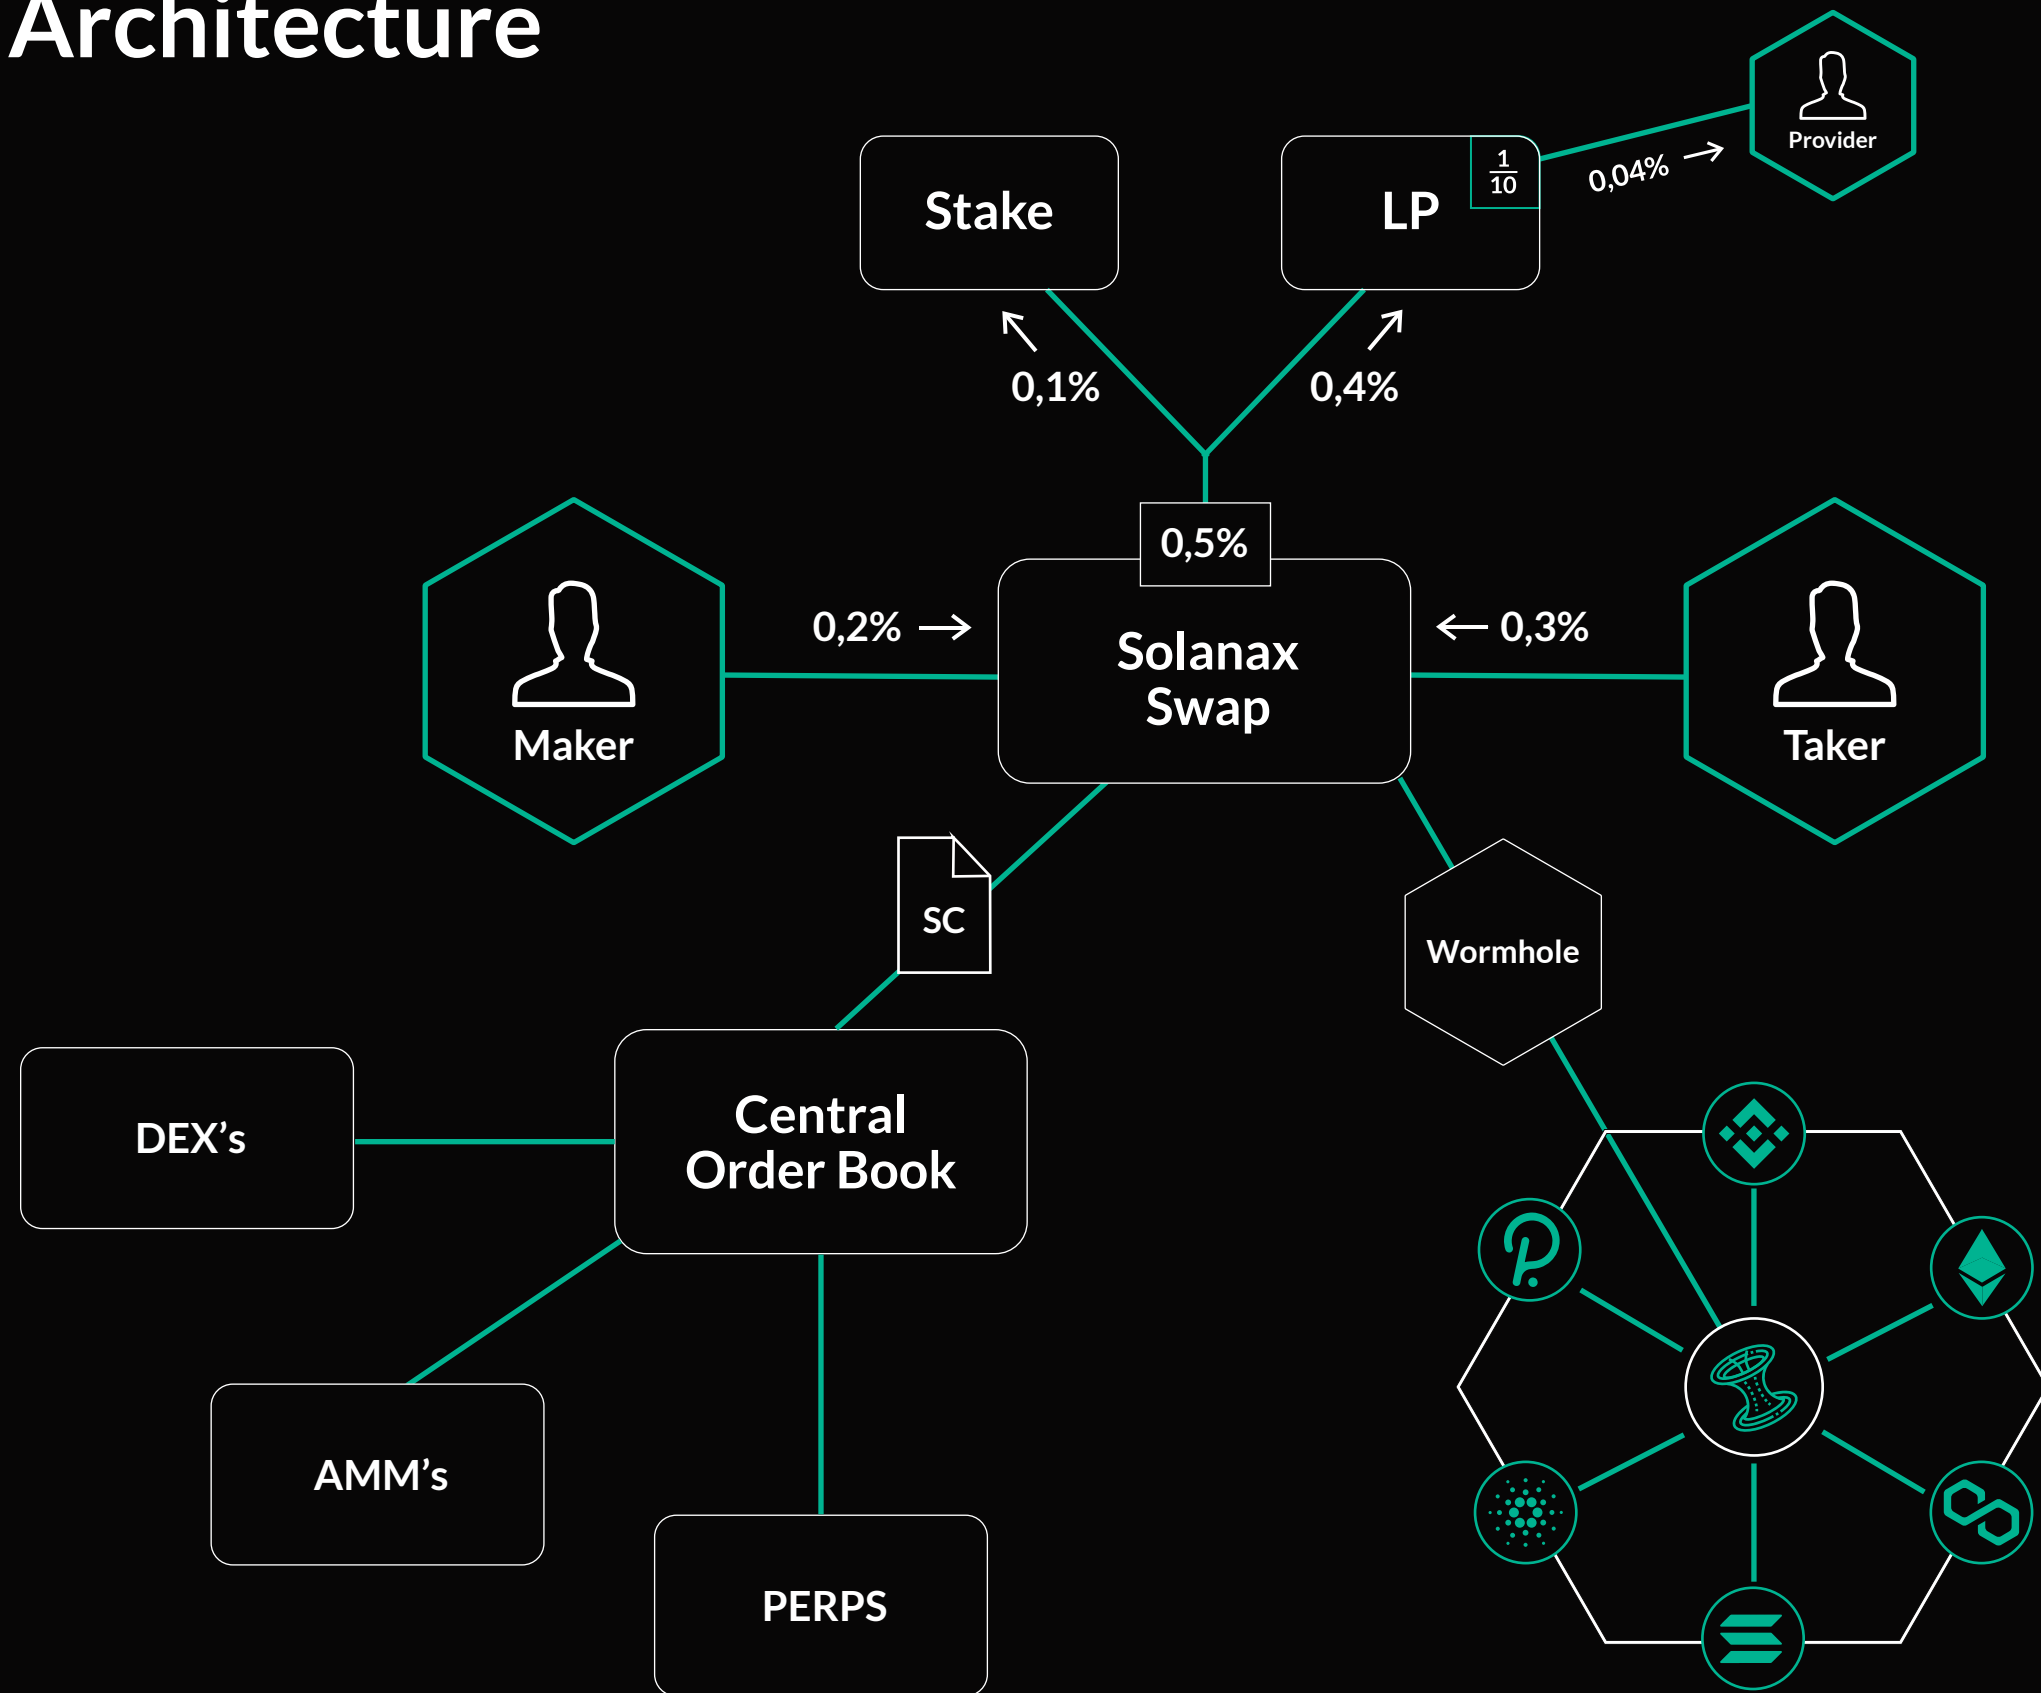

# Liquidity

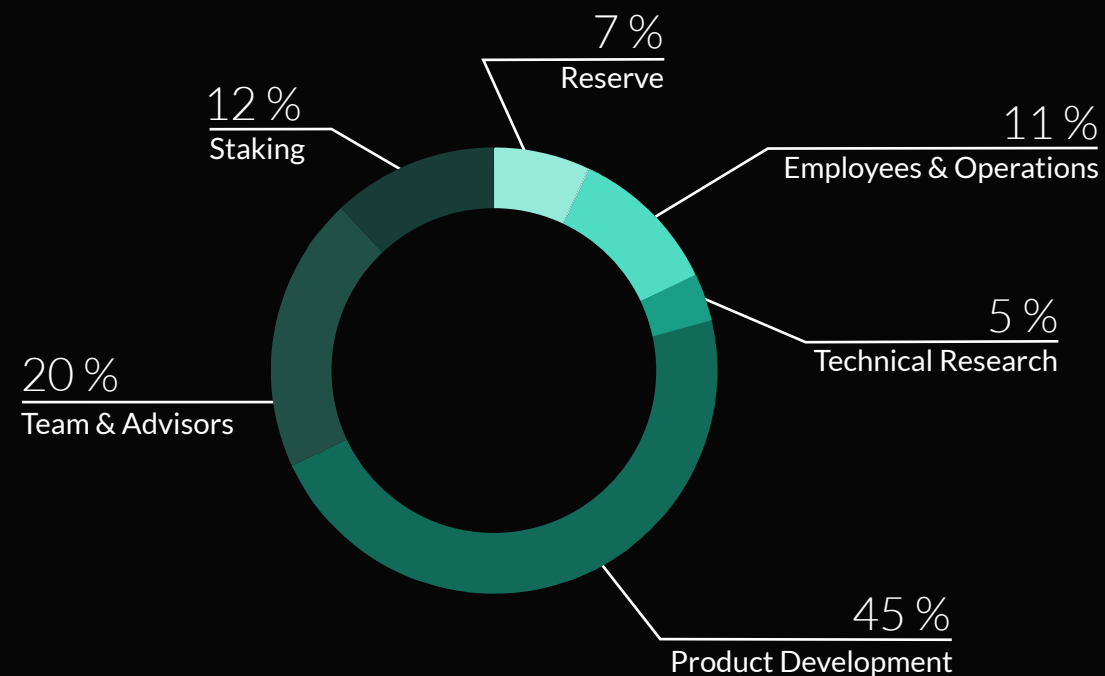

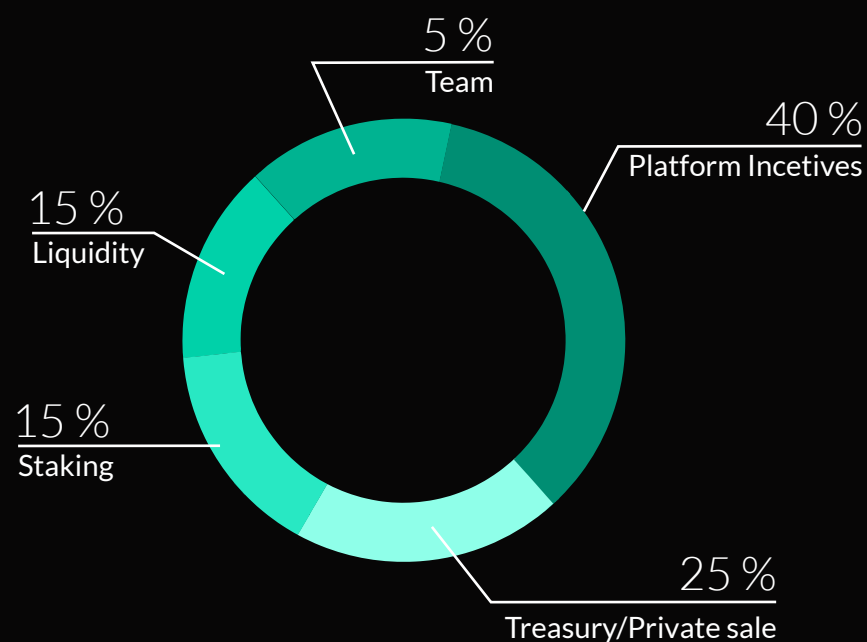

By placing limit orders that are transferred through the central limit order book, you can access the whole blockchain liquidity

# Architecture

# Tokenomics

## Use of Funds

## Allocation

### Private Sale

Condition	Price
With Vesting	\$0.1
W/O Vesting	\$0.15

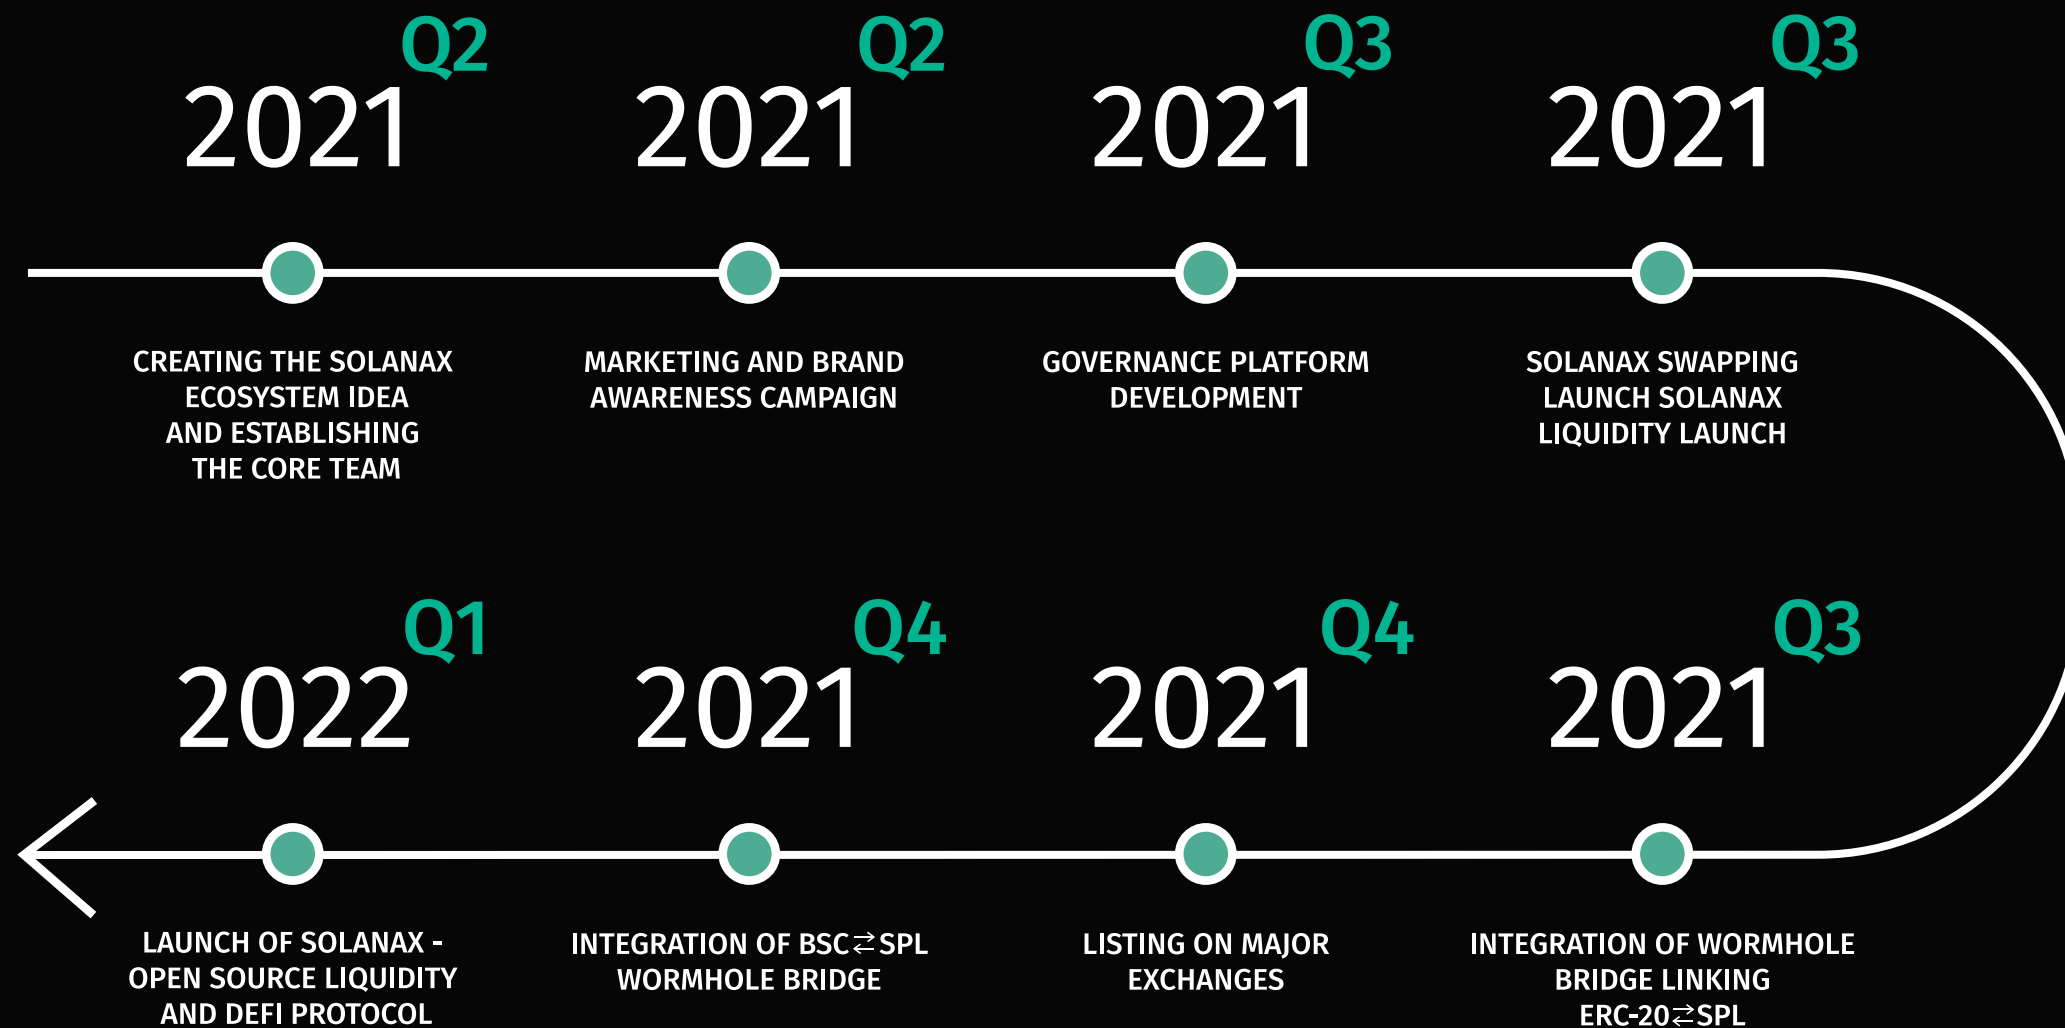

### Team Tokens Lockup Release

Starting by January 2022, 10% of team tokens will be released monthly

Token Name	<u>SOLD</u>
Token Type	<u>SPL</u>
Soft Cap	<u>\$2Million USD</u>
Hard Cap	<u>\$4.5Million USD</u>
Total Supply	<u>80,000,000 SOLD</u>
Initial Circ Supply	<u>20,000,000 SOLD</u>
Initial Market Cap	<u>\$6Million USD</u>

## Token Details

# Roadmap

# Our Team

**Arvydas Kublickas**  
CEO

Co-founder of the project, software developer with a thorough understanding of risk, compliance, and the blockchain ecosystem.

**Mindaugas Butkus**  
CTO

Co-Founder of Solanax. Started as a software developer and became interested in the blockchain technology. Currently supervising a development team.

**Richard Olamijulo**  
CMO

Specializes in putting best practices in digital marketing, communication, and project management into action to make a project succeed.

**Monika Veiverytė**  
HR

**Eleonora Morkūnaitė**  
UX/UI

**Gabriele Juknyte**  
Customer Service

**Matas Balnaitis**  
Head of Sales
